Concept Note

A 19th Century-Inspired Formal Jumpsuit for the Modern Woman

This project began with a simple question: Why are jumpsuits still so impractical for women? Inspired by this everyday struggle, I looked back in time to when women first started questioning the rules of fashion especially during the 19th century, when dress reform was just beginning to take shape.

Back then, women started challenging restrictive clothing like corsets and heavy skirts, pushing for garments that allowed them to move freely and live more comfortably. Drawing from that spirit of change, I've reimagined a formal black jumpsuit designed not just to look elegant, but to work for real life. It features a hidden zipper and a detachable bottom making it easier to wear without sacrificing style or sophistication.

The fabric I chose features a subtle leafy or parsley-inspired pattern, a nod to nature and the kinds of botanical motifs often found in 19th-century textiles. It adds quiet depth to the all-black look, keeping it formal but rich with meaning. The bold bow at the front is a modern twist on traditional Victorian ornamentation soft, sculptural, and strong. It represents femininity, but on our own terms.

"Reform in Style" is about blending beauty with purpose. It's a small tribute to the women who came before us, and a reminder that fashion can be thoughtful, powerful, and personal all at once.
